

Web API example

# Cuelist Cue Viewer

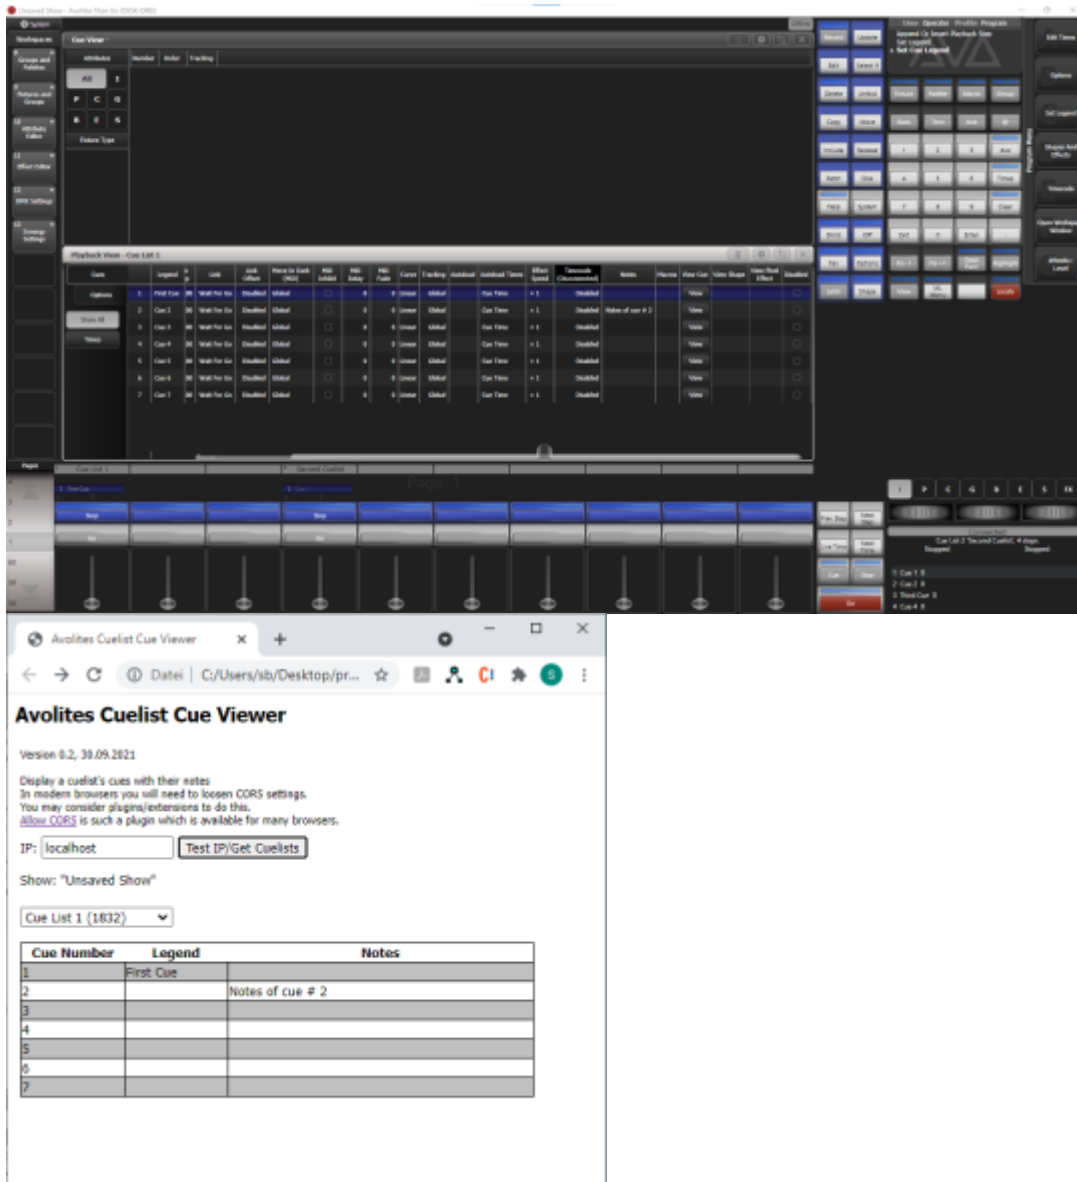

Show a cuelist's cues. This might be useful for a theater where you have someone to read the cues for you.

<b>author, date</b>	Sebastian Beutel, September 2021
<b>published</b>	<a href="https://www.avosupport.de/downloads/icke_siegen/ViewCues/">https://www.avosupport.de/downloads/icke_siegen/ViewCues/</a>
<b>prog. lang./ framework</b>	HTML, JS, CSS; none (wrote everything with a text editor)
<b>description</b>	Shows a cuelist's cues with their legends and notes. Idea from <a href="https://www.facebook.com/groups/Avolites/posts/2317601988372022/">https://www.facebook.com/groups/Avolites/posts/2317601988372022/</a>
<b>other requirements</b>	e.g. a web browser is required

## Screenshots

## How it works

The requests used in this example require your browser's CORS settings to be loosened (a security measure in modern browsers). You may use a plugin like [Allow CORS](#).

- open the file in your browser
- enter the ip address of your console (or leave localhost)
- click Test IP/Get Cuelists - this will try a connection to Titan on this address and return the cuelists if successfull
- the cues of the first cuelists are displayed
- you may select another cuelist to display

## API Requests

- [playback\\_x\\_cue\\_y](#)
- [playback\\_x](#)
- [handles\\_Playbacks](#)
- [Show/ShowName](#)
- [System/SoftwareVersion](#)
