

Video

Separate Programmer

By default the Web API is available on network port 4430 (hence the requests start with something like '<http://localhost:4430/>...'). Also, actions on the user interface, e.g. changing pages or selecting fixtures, do not reflect in the Web API. In turn anything done in the API doesn't reflect in the normal user interface, e.g. if you select fixtures or set a level you won't see it in Titan. This is pretty much like the blind mode or another user. Unfortunately this makes it really hard to debug any API requests as you see the outcome only when everything is correct and you did succeed programming something.

However there is a solution: you

API Requests
