

Web API example

Web API Demo

Simple website to trigger Web API requests with buttons and faders

| | |
|-------------------------------|---|
| author, date | Sebastian Beutel, 2016 |
| published | https://www.avolites.de/support-downloads/web-api-demo |
| prog. lang./ framework | HTML, JavaScript, CSS No framework used |
| description | see link above for a full explanation |
| other requirements | a web browser is required |

This implementation is rather straight-forward. The beauty is: you can try various requests, even see the replies, store your collection of requests as example, and load it later again. Also, as this uses only plain HTML/JS/CSS, it can be used as prototype for own projects.

Screenshots

API Requests

The Web API Demo itself uses only very few requests. However, here are the requests listed in the example file which comes with the demo:

- [softwareversion](#)
- [Handles](#)
- [KillAllPlaybacks](#)
- [KillPlayback](#)
- [SetPlaybackLevel](#)
- [Playbacks/FirePlaybackAtLevel](#)
- [CueLists/SetNextCue](#)
- [CueLists/Play](#)
- [CueLists/NextStep](#)
- [Playbacks/FlashPlayback](#)
- [Playbacks/ClearFlashPlayback](#)
- [SwopPlayback](#)
- [Playbacks/ClearSwopPlayback](#)
- [ShowName](#)
