Web API request

Handles/SetGroupPageName

Sets the name of the current page of a group.

API	https://api.avolites.com/12.0/Handles.SetGroupPageName.html
namespace	Handles
usage	`http://[ip]:4430/titan/script/2/Handles/SetGroupPageName?group={string}&name={string}`
parameters	group: the string indicating the group name, e.g. Playbacks, Colours, Fixtures name: the new name (legend) for this page
example	http://localhost:4430/titan/script/2/Handles/SetGroupPageName?group=Colours&name=hallo (link opens in new tab)
action	Sets the page legend of the current page of a workspace window.
returns	Nothing if successfull. “Error: Error executing an Action Script” if an error occured, e.g. a wrong group was indicated.
remarks	Always changes the current page's name. Works regardless if this window is open or pages are shown or not.
