

Web API request

Playbacks/ClearFlashPlayback

Set a playback to not flashed if flash is enabled

API	https://api.avolites.com/12.0/Playbacks.ClearFlashPlayback.html
namespace	Playbacks
usage	<code>http://[ip]:4430/titan/script/2/Playbacks/ClearFlashPlayback?handle={handle}</code>
example	http://localhost:4430/titan/script/2/Playbacks/ClearFlashPlayback?handle_location=Playbacks_1_1 (link opens in new tab)
action	un-flashes the indicated playback
parameter	Handle - the playback to be unflashed
returns	nothing of successful error message if an error occurred
remarks	use this to unflash a playback which has been flashed from the Web API using Playbacks/FlashPlayback - you cannot release or bring this down at the console itself.
