

Web API request

Playbacks/FlashPlayback

Set a playback to the flash level if flash is enabled.

API	https://api.avolites.com/12.0/Playbacks.FlashPlayback.html
namespace	Playbacks
usage	http://[ip]:4430/titan/script/2/Playbacks/FlashPlayback?handle={handle}
example	http://localhost:4430/titan/script/2/Playbacks/FlashPlayback?handle_location=Playbacks_1_1 (link opens in new tab)
action	flashes the indicated playback to the flash level (page 1 playbac 1 to 100%)
parameter	Handle - the playback to be flashed
returns	nothing of successful error message if an error occured
remarks	the flashed playback can only be 'unflashed' from the Web API using Playbacks/ClearFlashPlayback - you cannot release or bring this down at the console itself.
